MEMORANDUM

TO: OIC- Asst. Schools Division Superintendents
Chiefs, Curriculum Implementation Division
School Governance and Operations Division
Education Program Supervisors
Public School District Supervisors
Health Personnel
All Others Concerned

FROM: 
DORIS DJ ESTALILLA
OIC-Schools Division Superintendent

SUBJECT: SCHOOL MONITORING ON BASIC EDUCATION SERVICES DELIVERY AND VALIDATION AND SURVEILLANCE OF LEARNERS WHO HAVE BEEN ADMINISTERED WITH DENGVAIXIA VACCINE

DATE: January 10, 2018

1. This office announces the commencement of School Monitoring on Basic Education Services Delivery with Inclusion of Validation and Surveillance of Learners who have been administered with Dengvaxia Vaccine.
2. This activity aims to:
 - a. determine the level of Basic Education Services delivery in schools;
 - b. review the Master list of learners given the dengue vaccine (regardless of the number of doses), and flag these children for very close monitoring for any symptoms of fever and;
 - c. check the postings of *Information, Education and Communication (IEC)* materials (see attached) and initiate the referral report when necessary.
3. For Dengvaxia Vaccine validation and surveillance, monitoring officials are advised to give premium on school administrators to remind and enjoin to strictly adhere to the provisions of DepEd Memorandum No. 152, s. 2011 entitled *Preventing Dengue in Schools to Ensure that Schools Regularly Conduct Vector Control Measures to Eliminate Mosquitoes in the School Environment*. This is also to emphasize the urgency of the anti-dengue drive through the **4-S Strategy**, which stands for Search and Destroy, Seek early consultation, Self-protective measures, and Say "no" to indiscriminate fogging.
4. All monitoring officials are instructed to submit consolidated accomplishment report every Friday of the week utilizing the given format. (to be uploaded soonest)
5. For information and strict compliance of all concerned.

SUBJECT: *Coordination with DOH on Dengvaxia Immunization Information and Education Campaign (IEC) Materials Dissemination*

DATE: 4 January 2018

The Department of Education, in close coordination with the Department of Health (DOH), and the Department of the Interior and Local Government (DILG), began the implementation of a strengthened monitoring and surveillance system for learners who have received the dengue vaccine through DM No. 199, s. 2017 dated 7 Dec 2017, entitled *Monitoring and Surveillance of Learners Who Have Been Administered With Dengvaxia Vaccine*.

As part of the Department's coordination efforts with DOH, the Regional Directors of regions where vaccination has been conducted, namely, DepEd RO III, IV-A, VII, and the National Capital Region, are hereby instructed to provide assistance to DOH Health Promotion Officers in the distribution of IEC materials on *Dengvaxia* vaccination. In particular, the posting of these IEC materials in strategic places visible to learners, their parents, and the concerned public in all schools in the said regions should be ensured.

Aside from the dissemination of IEC materials, DOH shall also be sending out letters from Dr. Francisco T. Duque III, Secretary of Health, to the parents of learners who have been administered with the *Dengvaxia* vaccine. In this regard, please anticipate responses from the parents and prepare accordingly.

For your information and compliance.

January 2, 2018

DIOSDADO M. SAN ANTONIO
Director IV
Department of Education Calabarzon

Dear Dir. San Antonio:

Greetings!

The Department of Health (DOH) Regional Office Calabarzon, would like to request for your assistance in the posting of Information, Education and Communication (IEC) materials in classrooms and other areas within the school campuses that are frequented by students who have been immunized with the anti-dengue vaccine Dengvaxia, in time for the visit of Health Secretary Francisco T. Duque III, to school campuses in Calabarzon beginning January 11, 2018, Thursday.

Prominent concern of parents/guardians is the severe outcome of the vaccine to their children including the cost of treatment should their children be hospitalized, among others.

We hope to allay the fears of the parents/guardians whose children have been vaccinated with the anti-dengue vaccine Dengvaxia and to enlighten stakeholders on Dengvaxia related issues with your help.

IEC materials are available at the Regional Office Calabarzon Health Education and Promotion Unit (HEPU). For information / queries, please contact *Ms. Jeanette N. Atienza* or *Ms. Evangeline F. Caidoy*, at phone nos. 02.913.36.16.

Thank you.

Sincerely yours,

RIO L. MAGPANTAY, MD, PHSAE, CESO III
Director IV

Ano ang gagawin sa mga batang nabakunahan ng Dengvaxia?

Tingnan kung nasa masterlist ng DOH ang pangalan ng bata. Kung wala ang pangalan, magpalista. Babantayan ng DOH ang kalusugan ng mga bata sa mga susunod na taon.

Dalhin agad ang mga bata sa pinakamalapit na health facility kapag may sintomas ng dengue.

Nabakunahan na ng DengVaxia ang aking anak. Ano ang dapat kong gawin?

- Magkipag-ugnayan sa paaralan o sa pinakamalapit na RHU pang matiyak na ang inyong anak ay kasama sa master list ng DOH.
- Katulong ng DOH ang DepEd at lokal na pamahalaan para ipatupad ang pinaigting na monitoring and surveillance ng mga batang nabakunahan sa mga susunod na taon.
- Bantayang mabuti ang inyong anak at siguruhin na sakaling magkasintomas ng Dengue ay handa ang RHU at pampublikong ospital na agarang gamutin ang inyong anak.
- Dahil hindi 100% epektibo ang DengVaxia, maari pa ring magkaroon ng Dengue ang inyong anak. Pareho pa rin ang preventive measures na inerekomenda ng DOH upang makalwas sa Dengue.

Hinihikayat ang lahat na magpapatupad ng 4S KONTRA DENGUE:

- 1. SEARCH AND DESTROY BREEDING PLACES** - o ang paghahanap at pagsira sa mga lugar na pwedeng pangitagan ng lamok katulad ng mga bakid, lansan, gutang, plonra at iba pang talagyan na maaaring magpanatili ng malinis na tubig.
- 2. SEEK EARLY CONSULTATION** - o ang agarang pagpapalansula sa doctor kapag may karamdaman, hasan din ang paginom ng gamot ng walang reseta mula sa doktor.
- 3. SELF-PROTECTION MEASURES** - o ang pagprotektar sa sarili upang hindi makagalat ng lamok sa pamamagitan ng pagsusukat ng mga damit na may matahabang manggas, pagpapahid ng insect repellent sa mga bahagi ng balat na walang takip, at paggamit ng kulambo sa pagtulog.
- 4. SAY YES TO FOGGING IN TIMES OF IMPENDING OUTBREAK** - o ang pagpapansok pero Ito ay gawin lamang sa mga panahong maaaring biglang lumitaw at dumarami ang mga lamok.

Maging alerto! Komunsulta agad sa pinakamalapit na health center o pampublikong hospital kapag nilalagnat at may sintomas ng Dengue.

DENGUE
IMMUNIZATION

“Ang immunization program ng DOH ay mahalaga sapagkat napatunayan na ng ilang dekada na ang bakuna ay talagang nailigtas ang mga bata at mga sanggol mula sa mga vaccine-preventable diseases.”

— DOH Secretary Francisco T. Duque III

Ilan sa mga matagumpay na bakuna ay ang Oral Polio Vaccine dahil nakamit ng Pilipinas ang Polio-Free Status noong taong 2000 at ang Tetanus Diphtheria Toxoid Vaccine dahil sa nakamtan din ngayong 2017 ang Maternal and Neonatal Tetanus Elimination Status.

Paano maiiwasan ang dengue?

Hinihikayat ang lahat na magpatupad ng 4S kontra Dengue

1. *Search and destroy breeding places* – hanapin at sirain ang mga bagay na pwedeng maipunan ng malinis na tubig at pamahayan at pangitlugan ng lamok.
2. *Seek early consultation* – agad na komunsulta sa doktor kapag makaranas ng anumang sintomas ng dengue.
3. *Self-protection measures* – gumamit ng proteksyon laban sa kagat ng lamok tulad ng insect repellant, magsuot ng longsleeves, kulambo at iba pa.
4. *Say yes to fogging in times of impending outbreak* – maaring magpausok sa komunidad kung may banta ng dengue outbreak.
